Local Planning Council Priorities
Mar-26
Fiscal Year 2025-26

The Mendocino County Local Child Care & Development Planning Council, for fiscal year 2025-26, chose to largely accept the California Department of Social Services' proposed priorities, as the data used previously from the Early Learning Needs Assessment Tool was out of date.

Some changes were made to the CSPP Priority Assigned, increasing the priorities in the following zip codes: 95415; 95432; 95454; 95468; and 95469. Each of these zip codes has a CSPP site with one or more classrooms that have high enrollment and, in the case of 95454, have a waiting list. The priority for 95460 was also increased, though it does not have a CSPP center, because local knowledge tells us that there is the population to support one. It is also important to note, many of our zip codes are small and providers serve children from neighboring zip codes, as families commute for work, school, or to take older children to school.
